

Maintenance of DKL CHAIRS L1-D1 dental units

Within the L1-D1 series, different technical configurations and components were installed throughout the production period. In addition, units have been individually retrofitted over the years.

In order to provide you with a precise recommendation for the required maintenance steps, and in order to be able to compile the appropriate maintenance kit individually, we require detailed information about the respective unit.

Required Information:

1. Location/Commission: Full address of the unit's current location.
2. Serial Number: Photo of the type plate with the serial number (the type plate is located on the unit).
3. Photo Documentation: Please provide us with three clear photos:
 - Close-up of the doctor's device.
 - Two overall views of the unit (from the left and right sides), where the cuspidor is also clearly visible.
4. Conversions/Retrofits: Please check whether relevant technical changes have been made (e.g., conversion from water decontamination system to Bottle Care or similar modifications).

Data Transmission:

- Please send the above-mentioned information and photos, including your contact details, by e-mail to: info@dkl.de.

After receiving and reviewing your data, we will be happy to provide you with an individual offer for the maintenance of this L1-D1 dental unit.
